Kia ora,

MAITAI RIVER – ROCK WALL REPAIRS

During the August 2022 weather event some of Nelson's rivers and streams suffered bank and bed erosion, and/or were inundated with flood debris. We need to remediate some of these areas to reduce the chance of the river further damaging Council assets and/or private property.

Due to the high water flow associated with this event, significant erosion occurred. This resulted in the damage of the rock wall protecting some properties along Grove Street. To repair this damage, we need to work in the river to place large rocks to protect it.

There is also significant quantities of gravel that have accumulated in the river bed in this area. This gravel will reduce the capacity of the river in this stretch, which could result in an increased flood risk to neighbouring properties, businesses, and infrastructure. Some of this gravel is to be removed.

Nelmac Kūmānu Environmental has been contracted to repair the rock wall and to extract gravel in this section of the lower Maitai River. During the remediation there will be diggers in the river, and an increased level of activity including trucks moving around the area.

We anticipate work to take around 2 weeks to complete (weather dependent) and we will aim to commence on Monday 24 March 2025.
