

Notice of Intended Roading Works – Chip Sealing of York Terrace

Project: NCC – York Terrace Stormwater Upgrade

Dates: Monday 11th May – Friday 15th May

Dear Resident,

This is to let you know we intend to reseal York Terrace next week. When finished, the road will have a chip seal surface. This work is weather dependent. In the event of unsuitable weather conditions or other unforeseen circumstances, the work will be delayed.

Please ensure your vehicle is not parked on York Terrace during the dates above.

Once the seal is laid

Chip seal, bitumen, and other road materials require time to fully settle after they are put in place so please treat all new surfaces with extra care.

- It may sound noisier at first, but this will reduce over time. Loose chips (stones) take time to move and sink into the emulsion.
- Drivers, please drive to the temporary speed limits and limit sharp turns, heavy braking, wheel spinning and static use of power steering
- The seal will be regularly checked as it beds in, so you may see workers on site again

What access will be available during this time?

Temporary traffic management and detours will be in place for the duration of the works. Please follow guidance and signage on site. Vehicle access for residents, couriers and home help will be available where possible, however during phases of resealing you may experience some delays. Pedestrian access will be provided.

Thank You

We appreciate the planned works may cause an inconvenience. We appreciate your patience, understanding and cooperation.
